

# Customers 1: Survey Customers

## All About This Practice

"Know what your customers want most and what your company does best. Focus on where those two meet."

▶ Kevin Stirtz

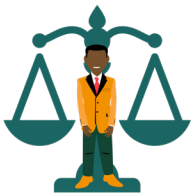

"Don't find customers for your products, find products for your customers."

▶ Seth Godin

**Description of Habit:** We regularly ask customers (existing, potential and former) if our products/services are the right fit for them

**Impact / outcome:** We are confident that we're offering a competitive product/service mix

### Measurement scale:

- 0 = We do not specifically ask customers what they might want beyond what we currently offer
- 1 = We have conducted a formal or informal survey of existing and former customers in the past six months
- 2 = We have a schedule for regularly consulting existing and former customers about what they might want beyond what we currently offer, why former customers stopped buying from us and use that information to improve product and service offerings

| <b>Step 1 (Getting Started): Tools</b>  |                                                                                                                                                                                                                                                                |
| <b>Key tool: Sample customer survey</b> | This tool guides you on how to survey your existing customers. It takes you through some of the preparation guidelines on what you need to do/know before you conduct your survey, and the factors to consider when creating survey questions.                 |
| Customer survey instructions            | This tool guides you on how to survey your customers – both existing and past. It takes you through some of the preparation guidelines on what you need to do/know before you conduct your survey, and the factors to consider when creating survey questions. |
| Market research steps                   | You can use this tool to guide you through the process of doing market research for your new business opportunity. Use the Market Research Plan to document the feedback you are getting on your new idea.                                                     |

|                                             |                                                                                                                                                                                                                                                                                                                                                                                                        |
|---------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market research plan                        | Market research is a critical component when you're launching a product or trying to improve an existing product. It will provide you with all the information you need to make better business decisions.                                                                                                                                                                                             |
| Mom test tool                               | The ideation tool will help you conduct research with potential customers to find out if the 'solution' your business offers is addressing a real or perceived need that they have. It will help you come up with the right questions to ensure the customer research that you do is clear, comprehensive and unbiased.                                                                                |
| Customer needs analysis                     | In a time of uncertainty or crisis, it is very important to reach out to your customers. Check-in with them and ensure they hear from you and know that you care. Check with them if there is anything you can do to support them.                                                                                                                                                                     |
| <b>Step 1 (Getting Started): Courses</b>    |                                                                                                                                                                                                                                                                                                                                                                                                        |
| Marketing: Getting started                  | The primary function of marketing is to increase awareness of your business among your potential customers and to attract them to buy your products and services rather than those of your competitors. Marketing techniques help you to identify who your typical customers are, to know what they are interested in, what influences their decision to buy and how to attract them to your business. |
| Customer relationship marketing             | How do you manage customers and create stronger customer relationships? As a business manager, it's critical to nurture your customers so they keep coming back. Customer retention will ensure stable revenue, and non business will survive without loyal customers!                                                                                                                                 |
| <b>Step 2 (Getting Started): Tools</b>      |                                                                                                                                                                                                                                                                                                                                                                                                        |
| Persona template and product canvas         | The user persona template tool helps you make a realistic picture of your ideal customer to support product design. User personas are stories about imagined ideal customers. Personas represent real, living and breathing people who will engage with your product (website, device, app, software etc.).                                                                                            |
| User story mapping                          | User story mapping is a visual exercise that helps product managers and their development teams define the work that will create the most delightful user experience. Teams write user stories in a format that captures business value and can be completed within a development iteration (usually called a sprint).                                                                                 |
| How to - User story mapping workshop agenda | This tool will walk you through the key steps to conducting user story mapping to define your ideal customer, and engage your whole team in brainstorming ideas to meet their needs and build innovative new products.                                                                                                                                                                                 |

|                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Assessing customer relationships tool          | Businesses spend 80% of their marketing budget looking for new customers and clients instead of nurturing, retaining, and maintaining the customer relationships they have. This tool will help you assess the status of your relationship with your customers.                                                                                                                                                                                                                                      |
| Building customer relationships tool           | This tool lists some of the strategies that you can use to develop long lasting relationships with your customers. It is not exhaustive, so please add additional strategies that you also use. Take some time and reflect on what you are currently doing and how you can improve your practices to ensure you are holding on to your customers in the long-term. This will provide enormous financial benefit to the company and invaluable feedback to improve products and services as you grow. |
| Positioning strategies template                | This positioning strategy tool will help your product stand out and be different. Through these strategies, your product can stand out by targeting the right audiences with the best message.                                                                                                                                                                                                                                                                                                       |
| Market segmentation, targeting and positioning | This tool helps you come up and understand the different market segment your business is targeting                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Step 2 (Getting Started): Courses</b>       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Market segmentation, targeting and positioning | How do you position your products to different customers? How do you overcome the challenge of structuring your products and services so they meet diverse customer demands in the most efficient and profitable way? This course will teach participants how to segment a market, identify target customers and position products.                                                                                                                                                                  |
